Leveraging PDMP Data Analysis and Collaboration to Maximize Overdose Prevention Capacity for Stakeholders

NEW YORK STATE | Department of Health

Project Overview

- NYSDOH Bureau of Narcotic Enforcement (BNE)

- Focus: Leveraging PDMP data for overdose prevention

- Funded by Bureau of Justice Assistance (BJA) Harold Rogers PDMP grant

NEW YORK STATE | Department of Health

Project Objectives

1. Increase practitioner PDMP search rates

2. Analyze and disseminate PDMP data to Local Health Departments and state partners

Objective 1 – Increasing PDMP Search Rates

- Collect feedback on barriers to PDMP searching

- Develop and disseminate practitioner education

- Analyze practitioner search rates

- Create and distribute Provider Reports

- Evaluate impact of interventions

NEW YORK STATE | Department of Health

Objective 2 – PDMP Data Analysis and Dissemination

- Create Data Reports for LHDs and state partners

- Focus on prescription stimulants, buprenorphine, and other controlled substances

- Incorporate social determinants of health data

- Collaborate with LHDs to tailor reports

Collaborative Approach

- Partner with New York State Association of County Health Officials (NYSACHO)

- Conduct meetings with LHDs, associations, and state partners

NEW YORK STATE | Department of Health

Timeline and Key Milestones

• Year 1: Survey development, initial data analysis, education creation

• Year 2: Report dissemination, impact evaluation

Expected Outcomes

- Improved practitioner PDMP search rates

- Enhanced use of PDMP data in overdose prevention planning

- Development of tailored Data Reports

- Established framework for PDMP data use in research

NEW YORK STATE | Department of Health
