Executive Committee Support:		
PDMP TTAC, IIR	Jim Giglio	Y
PDMP TTAC, IIR	Patrick Knue	Y
Guests:		
Utah/Nebraska	Naresh Sundar Rajan	Y

Conference Call Agenda/Minutes

➤ Roll Call

Quorum established

➤ Approval of Minutes from 1-22-2020

Per Jean Hall's (KY) direction, the notes on the nomination subcommittee were removed. Motion to approve the minutes as amended was made by Chad Garner (OH); seconded by Ron Larson (UT). Unanimously approved.

➤ Alternate Metadata Schema Update

After further review of the Metadata schema, both Jean Hall (KY) and Chad Garner (OH) found issues within the XSD file; including a mismatch between the XML schema and the XSD. Chad Garner (OH) defined an XSD file as the definition file for an XML schema that can be used as a validation document for an XML file.

Jean Hall (KY) asked the group if the XML and XSD should be put out together as a package or release them separately. After discussion it was agreed that it would be best to release both files together as a package instead of releasing them separately and potentially causing confusion.

Jean Hall (KY) proposed to have a call to discuss the necessary changes. The call would include Tom Carlson (Carlson Consulting), Chad Garner (OH) and Jean Hall (KY). The goal is to have the call by next month. Pat Knue (TTAC) will set up the call.

➤ Subcommittee Updates

Minutes from each of the subcommittee meetings were emailed to the members prior to this conference call.

- Operations Subcommittee – Jean Hall (KY)
 - Patient Matching Workgroup

Jean hall (KY) discussed the continual work on the patient matching group and the creation of metrics that will aid in determining valid patient matching.

- Technical Architecture Subcommittee – Ron Larson (UT)

Ron Larson (UT) discussed how the subcommittee went through the difference schema elements. There is a need to set a meeting with Tom Carlson to clarify coding for data elements in the schema. The group is currently waiting to hear back from him to set up this meeting.

- Standards Compliance Subcommittee – Chad Garner (OH)

Chad Garner (OH) stated that the group did not meet. However, they are currently trying to identify a way to collaborate online to get more work accomplished instead of having phone calls.

➤ Other Business

- **ONC PMIX to HL7 FHIR mapping**

Jean Hall (KY) mentioned that she was approached by the Office of the National Coordinator (ONC) about doing a PMIX to FHIR mapping project. ONC has received funding to do this, but the time is limited (March to June of 2020). After some discussion it was determined that timing was not good for anyone in the group and was further exacerbated by the fact that PMIX will soon be updated. However, there was a concern that if no input was given by PMIX, ONC would do the mapping without input. It was discussed whether the executive committee should nominate partners who have worked with mapping PMIX to FHIR previously, such as Appriss, to be on the call. Jean Hall (KY) asked Pat Knue (TTAC), if a motion was needed to identify these partners as well as the group to be on the call. Pat Knue (TTAC) said a vote for the identification of the group was not needed, but the endorsement of the members of the group would require a vote.

- **Review of the PMIX Goals**

Kevin Borchert (NE) requested that the PMIX goals be reviewed during one of the executive committee meetings. Jean Hall (KY) agreed and requested the review of the goals at the next meeting and that the goals be sent to the group by next week. Jean Hall (KY) also suggested that if there are any comments/questions/concerns to be placed on the agenda for the next meeting, please email them to either her or Pat Knue (TTAC) by March 13.

- **PMIX website**

Jean Hall (KY) mentioned that a small group is working on the website redesign. A mock-up is being developed along with new logos. The hope is that the new logos will be ready by next meeting.

➤ Next Meeting: Wednesday, March 17th at 12p ET

➤ Action Items

1. TTAC will send out PMIX goals

TTAC will set up a call with Carlson Consulting to discuss the XSD document
