Conference Call Agenda/Minutes

- Roll Call 12 for quorum

Quorum established

- Approval of Meeting's Minutes from 5-19-2021, 6-16-2021, 8-4-2021, and 9-15-2021

Motion to approve the minutes was made by Stan (PA), seconded by Nilu.

Unanimously approved.

- Schema Vendor Workgroup

Jean Hall (KY) stated that, back in August, the PMIX Executive Committee received feedback about the request and response schemas; there were some issues defining the pieces of schema. All have been corrected and TTAC will send the updated files to the subcommittee members to provide feedback within the next two weeks.

Jean Hall (KY) discussed the metadata proposal. This is to define the elements that should be available in the metadata and allow the hubs to define the lay out.

She went through each element for discussion with subcommittee:

- Requestor Role or User Role – majority preferred the term 'requestor role'
- Requesting State and Requesting System – the identification of the state where the request originated. Jean Hall (KY) stated that this field currently allows either state or system. She recommends separating these into 2 different fields to identify the entity by state location and system. Subcommittee agreed with this update.
- Request Sent – date/time stamp would be UTC Time; in HH:MM:SS.000 format
- Requestor Identifier and Type – changed to conditional with a requirement that all licensed providers send an identifier
- Requestor Organization – subcommittee was split 50-50 on whether to make the cardinality of this field optional or conditional
- Requestor Facility – changed cardinality to conditional
