### Required PDMP Enrollment and Use

- Required enrollment - Prescriber     Required enrollment - Dispenser     Compliance Process for Enrollment Mandates

A prescriber who holds a controlled substance registration issued pursuant to § 4732 of this title must be registered with the Prescription Monitoring Program. A prescriber who is issued a controlled substance registration for the first time shall register with the Prescription Monitoring Program within 90 days of issuance. Failure to comply with this subsection may result in disciplinary action pursuant to § 4735 of this title.

Enrollment Effective Date(s): January 1, 2014

- Required use - Prescriber     Required use - Dispenser     Compliance Process for Use Mandates

A prescriber, or other person authorized by the prescriber, shall obtain, before writing a prescription for a controlled substance listed in Schedule II, III, IV or V for a patient, a patient utilization report regarding the patient for the preceding 12 months from the computerized program established by the Office of Controlled Substances when the prescriber has a reasonable belief that the patient may be seeking the controlled substance, in whole or in part, for any reason other than the treatment of an existing medical condition. The prescriber shall review the patient utilization report to assess whether the prescription for the controlled substance is necessary. Regulations: 9.5First time, outpatient prescription for Acute Pain; maximum seven-day supply. 9.5.1When issuing a prescription for an opioid analgesic to an adult patient for outpatient use for the first time, for an Acute Pain Episode, a practitioner may not issue a prescription for more than a seven-day supply. 9.5.2A practitioner may not issue a prescription for an opioid analgesic to a minor for more than a seven-day supply at any time and shall discuss with the parent or guardian of the minor the risks associated with opioid use and the reasons why the prescription is necessary. 9.5.3Notwithstanding subsections 9.5.1 and 9.5.2, if, in the professional medical judgment of a practitioner, more than a seven-day supply of an opiate is required to treat the adult or minor patient's acute medical condition, then the practitioner may issue a prescription for the quantity needed to treat such acute medical condition. The condition triggering the prescription of an opiate for more than a seven-day supply shall be documented in the patient's medical record, the practitioner shall query the PMP to obtain a prescription history, and the practitioner shall indicate that a non-opiate alternative was not appropriate to address the medical condition and comply with subsections 9.6.4 and 9.6.5. 9.6Subsequent prescriptions. Subject to the exemptions set forth in subsection 9.7, after the first time prescription, or after the patient has been issued outpatient prescription(s) totaling up to a seven day supply, prior to issuing a subsequent prescription for an opioid analgesic for Acute Pain, the practitioner must perform an appropriate evaluation of the patient's medical history and condition, including the following: 9.6.1Query the PMP to obtain a prescription history for the first subsequent prescription that goes beyond the initial 7-day period and, for any subsequent prescriptions after that, the PMP shall be queried at the discretion of the practitioner unless otherwise required; 9.6.2Administer a fluid drug screen, at the discretion of the practitioner; 9.6.3Conduct a physical examination which must include a documented discussion between the practitioner and patient to: Elicit relevant history, explain the risks and benefits of opioid analgesics and possible alternatives to the use of opioid analgesics, identify other treatments tried or considered, and determine whether opioid analgesics are contra-indicated; 9.6.4Obtain an Informed Consent form, signed by the patient (or the patient's proxy), that must include information regarding the drug's potential for addiction, abuse, and misuse; and the risks associated with the drug of life-threatening respiratory depression; overdose as a result of accidental exposure potentially fatal, especially in children; neonatal opioid withdrawal symptoms; and potentially fatal overdose when interacting with alcohol; and other potentially fatal drug/drug interactions, such as benzodiazepines; and 9.6.5Schedule and undertake periodic follow-up visits and evaluations of the patient to monitor and assess progress toward goals in the treatment plan and modify the treatment plan, as necessary. The practitioner must determine whether to continue the treatment of pain with an opioid analgesic, whether there is an available alternative, whether to refer the patient for a pain management or substance abuse consultation. 9.7Exemptions to subsection 9.6: 9.7.1If a patient has been discharged from an in-patient facility or out-patient surgical center, and, in the professional medical judgment of the practitioner, more than a seven-day supply of an opiate is required to treat the patient's acute medical condition, the practitioner may issue a second prescription for not more than a seven-day supply without satisfying the requirements of subsection 9.6. 9.7.2If a practitioner satisfies the requirements of subsection 9.6 at the time of the first time prescription, the practitioner may issue a subsequent prescription for not more than a seven-day supply without repeating the requirements of subsection 9.6. 9.8Chronic Pain patients. In addition to the requirements of subsection 9.6, the practitioner must adhere to the following additional requirements for Chronic Pain patients: 9.8.1Query the PMP at least every six months, more frequently if clinically indicated, or whenever the patient is also being prescribed a benzodiazepine; 9.8.2Query the PMP whenever the patient is assessed to potentially be at risk for substance abuse or misuse or demonstrates such things as loss of prescription(s), requests for early refills or similar behavior; 9.8.3Administer fluid drug screens at least once every six months; 9.8.4Obtain a signed Treatment Agreement, pursuant to subsection 9.3.13; 9.8.5Conduct a Risk Assessment as defined in subsection 9.3.10; 9.8.6Document in the patient's medical record

alternative treatment options that have been tried by the patient, including non-pharmacological treatments, and their adequacy with respect to providing sufficient management of pain; 9.8.7 Make efforts to address psychiatric and medical comorbidities concurrently, rather than sequentially, when concurrent treatment is clinically feasible; and 9.8.8 At the practitioner's discretion, seek a case review and consult with, or otherwise refer the patient to, a state-licensed physician who holds a subspecialty board certification in addiction psychiatry from the American Board of Psychiatry and Neurology or an addiction certification from the American Board of Addiction Medicine or an addiction specialist if any of the following occur: 9.8.8.1 Adulterated drug tests; 9.8.8.2 Diversion of prescribed medications; or 9.8.8.3 The patient has obtained controlled substances elsewhere without disclosure to the physician, as evidenced by PMP data. 9.9 Practitioners treating the following patients are exempted from the requirements of this Regulation: 9.9.1 Hospice care patients; 9.9.2 Active cancer treatment patients; 9.9.3 Patients experiencing cancer-related pain; 9.9.4 Terminally ill/palliative care patients; and 9.9.5 Hospital patients, during the hospital stay, including any prescription issued at the time of discharge, so long as that discharge prescription is for a quantity of a 7-day supply or less. (d) A dispenser including those dispensing an amount deemed medically necessary for a 72-hour supply, shall submit the required information regarding each prescription dispensed for a controlled substance, in accordance with the transmission methods and frequency established by regulation issued by the Office of Controlled Substances. When needed for bona fide research purposes and in accordance with applicable regulation, the Office of Controlled Substances may require a dispenser to submit the required information regarding each prescription dispensed for a drug of concern, but in no event should dispensers be required to submit such information any more frequently than that required for controlled substances. The following information shall be submitted for each prescription: (1) Pharmacy name; (2) Dispenser DEA registration number; (3) Dispenser National Provider Identifier (NPI); (4) Date drug was dispensed; (5) Prescription number; (6) Whether prescription is new or a refill; (7) NDC code for drug dispensed; (8) Quantity dispensed; (9) Approximate number of days supplied; (10) Patient name and date of birth; (11) Patient address; (12) Prescriber DEA registration number and name; (13) Prescriber NPI; (14) Date prescription issued by prescriber. (e) When a dispenser has a reasonable belief that a patient may be seeking a controlled substance listed in Schedule II, III, IV or V for any reason other than the treatment of an existing medical condition, the dispenser shall obtain a patient utilization report regarding the patient for the preceding 12 months from the Prescription Monitoring Program before dispensing the prescription.

Use Effective Date(s): legislation approved July 15, 2010, no effective date listed
