Each board has setup up their own requirements for accessing the ND PDMP under certain circumstances. Requires opioid treatment programs to use the PMP at least monthly for each patient. Prior to dispensing a prescription, each dispenser licensed by a regulatory agency in the state of North Dakota who dispenses a controlled substance to a patient, for the treatment of pain or anxiety shall, at a minimum, request and review a prescription drug monitoring report covering at least a one-year time period or another state's report, or both reports, when applicable and available, if the dispenser becomes aware of a person currently: a. receiving reported drugs from multiple prescribers; b. receiving reported drugs for more than twelve consecutive weeks; c. abusing or misusing reported drugs; d. requesting the dispensing of a reported drug from a prescription issued by a prescriber with whom the dispenser is unfamiliar; or e. presenting a prescription for reported drugs when the patient resides outside the usual pharmacy geographic patient population. 2. After obtaining an initial prescription drug monitoring report on a patient, a dispenser shall use professional judgment based on prevailing standards of practice in deciding the frequency of requesting and reviewing further prescription drug monitoring reports or other state's reports, or both reports for that patient. 3. in the rare event a report is not immediately available, the dispenser shall use professional judgement in determining whether it is appropriate and in the patient's best interest to dispense the prescription prior to receiving and reviewing a report. 4. For the purpose of compliance with subsection 1, a report could be obtained through a prescription drug monitoring program integration with software or also a board-approved aggregate tool, for which the NARxCHECK will be an approved tool. The national association of boards of paharmacy foundatoin's NARxCHECK service is a risk assessment tool for health care providers and pharmacists that accesses patient prescription information from prescription drug monitoring databases, analyzes the data, and provides a risk-based score that includes prescription drug monitoring program data and graphical analysis to assis in prescribing and dispensing decisions.
